

S4-B4 Tick Mock

EFFECTIVE TIME MANAGEMENT FOR IITB STUDENTS

EMPATHY

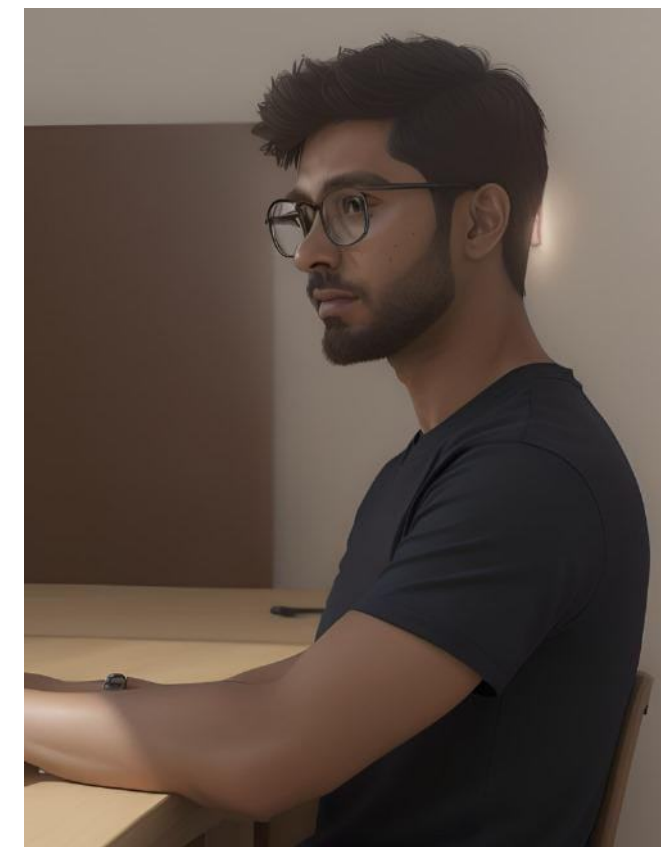

PERSONA

Goals

Regain control over his schedule and achieve all the aspirations he came to IITB with.

Frustration

Constant feeling of being overwhelmed and guilt or self-criticism

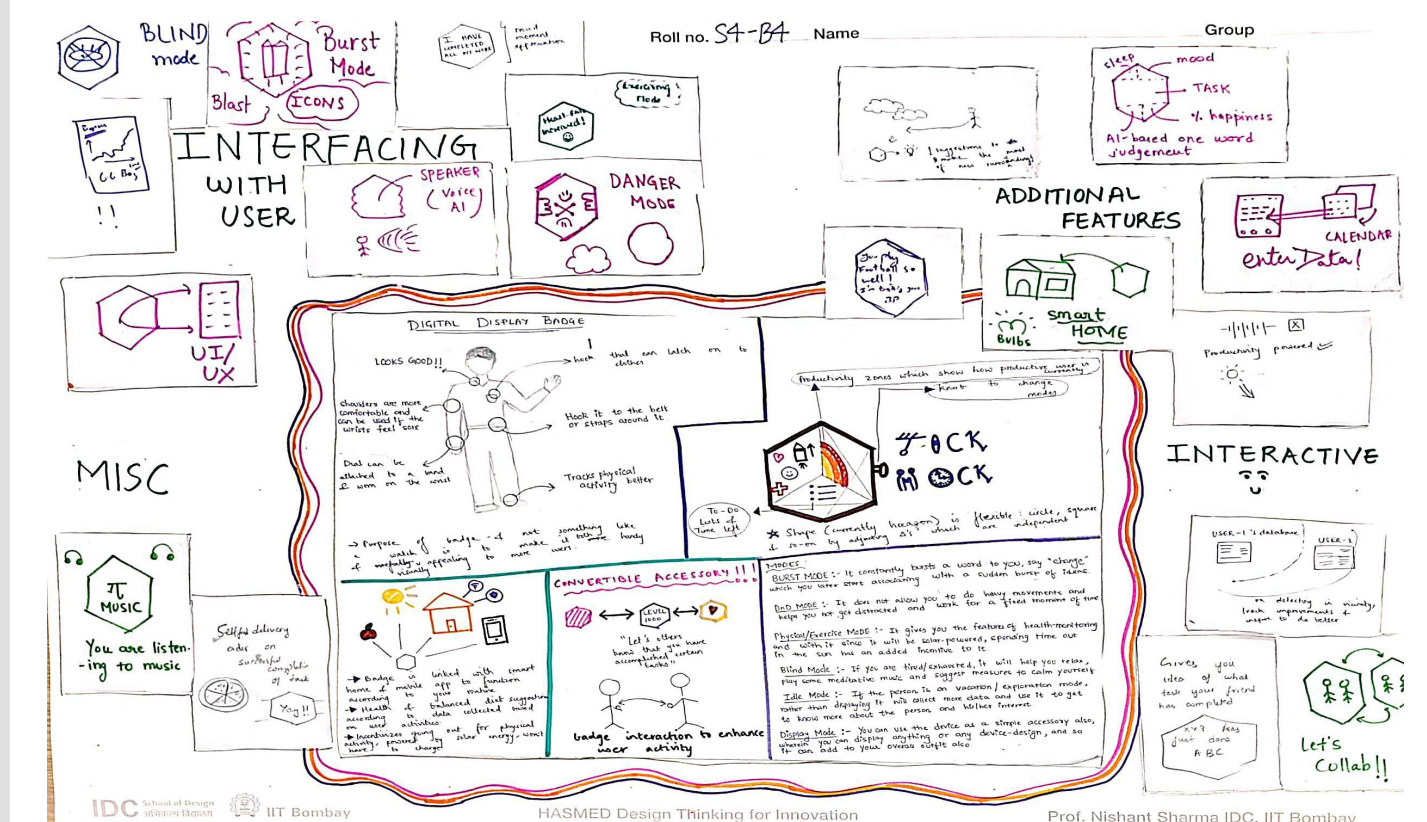

ACTIONS

Craft a Wearable device providing Audio-Visual cues for schedule reminders, notifying users of upcoming and ongoing tasks, while employing AI to personalize and optimize the schedule for individual needs.

RATIONALE

By proposing a practical tool with personalized solutions and AI integration, it not only addresses the core issue of time mismanagement but also maximizes effectiveness in optimizing schedules.

IDEATION

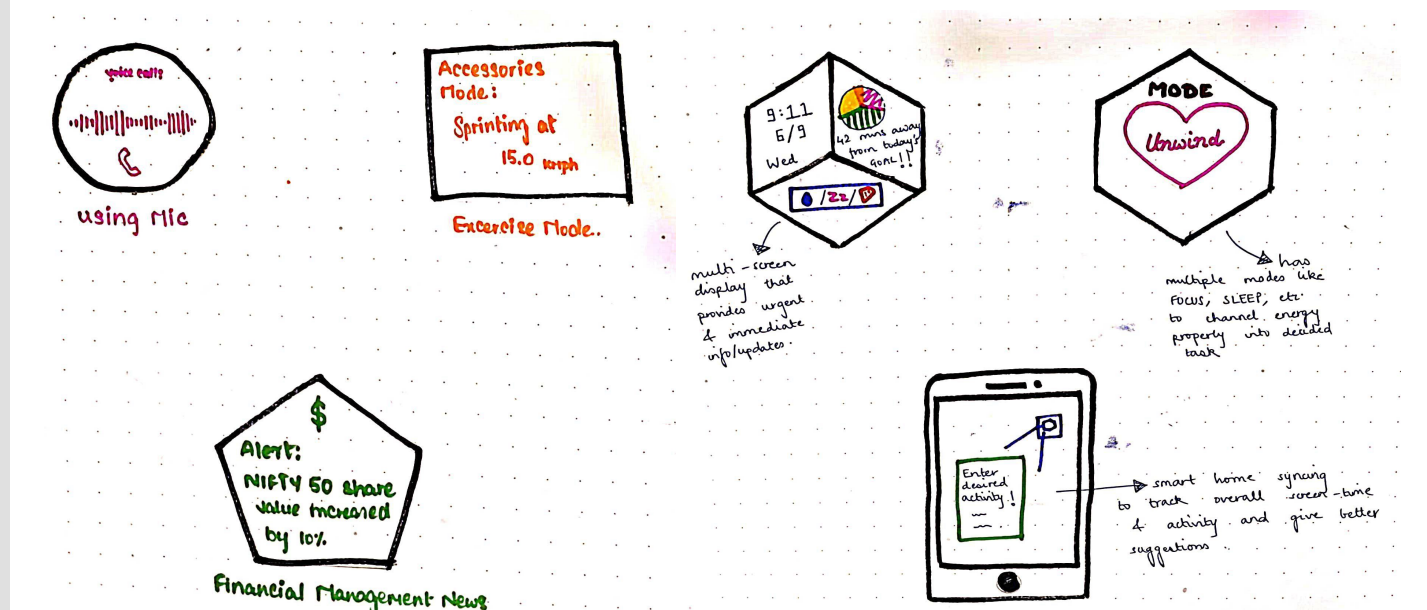

KEY INSIGHTS

Users have several activities regarding academic, extracurricular and social obligations, which results in them feeling overwhelmed, guilty and self-critical which results in poor time management.

RATIONALE

By addressing the problem of time management with enhancement of the user's schedule, the student community can be uplifted and empowered mitigating their current issue of time wastage.

HOW MIGHT WE innovate a wearable solution that specifically targets Rolesh's time management challenges, helping in prioritization and goal achievement through a well-defined schedule, while reducing the time wasted on useless tasks, and integrates AI capabilities to deliver tailored insights and support, thereby enhancing his overall experience in mastering effective time management in all his endeavors.
